

DOWNLOADING DUO MOBILE

- 1) Download the Duo Mobile App to log into UConn websites.
- 2) Allow your phone to receive push notifications from DUO.
- 3) Set up Duo Mobile to receive push notifications. Do **not** use the text messaging option as this may not work upon arrival to the U.S. Do **not** use a prior telephone number. Do **not** use a friend or family member's phone number for DUO as it will not work when you arrive in the U.S.

The screenshot shows the 'Two-Factor Authentication Portal' with navigation links for '2FA Home', 'Devices', 'Services', and '2FA Help'. The main content area includes a title 'Two-Factor Authentication Portal', a brief explanation of 2FA, and a link to support pages. Below this are two main action cards: 'Add and Manage Devices' with a 'Manage Devices' button, and 'Enable 2FA Everywhere' with an 'Opt in to 2FA' button. Both cards include a small informational icon and text: 'Two-factor authentication required to manage existing settings.' and 'Two-factor authentication required to update settings.'

[Login to update your DUO settings here!](#)

Click "Manage Devices"

Select "Automatically send this device a DUO Push"

Accessing your 2FA via Duo Mobile App is easy and immediate so long as you've properly setup the configurations on your current device. Set up the Duo Mobile App to receive **push notifications** before you arrive to prevent problems accessing UConn websites, portals and information.

Two Factor Device Management Portal

Use this page to add your first secondary device or manage existing devices linked to the 2FA service. Note: If you are updating your devices, you will be prompted to authenticate with your second factor before you can make changes. If you need to add a hardware token, use the [Hardware Token Management Page](#).
